

Integrity Mechanical Inc.

At Integrity Mechanical, our name says it all. Our staff adheres to a stringent code of ethics resulting in fair bids, fine craftsmanship and integrity in the workplace.

Our plumbing and HVAC construction-contracting firm provides premier design, efficient installation and attentive, professional service.

- **COMMERCIAL**
- **INDUSTRIAL**
- **INSTITUTIONAL**

For over a decade, Integrity Mechanical has completed jobs on time and on budget for commercial, industrial and institutional clients. The corporation has performed preventative maintenance on its installed equipment and existing systems to ensure energy efficiency, longevity of equipment and comfortable environments.

Integrity, Responsibility and Hard Work are the foundation of our company.

These business ethics are reflected in our construction process and professional service.

The result of our dedication is solid, long-term customer relationships.

CONSTRUCTION

● HVAC ● PLUMBING

Whether a public school addition or new construction of an industrial building, the staff at Integrity Mechanical has the training and experience to design heating, cooling and plumbing systems that are the most economical to install and the most energy efficient to operate.

Installation is done expediently while delivering the highest level of excellence in customer service.

SERVICE

● ENERGY MANAGEMENT
● PREVENTATIVE MAINTENANCE

With an extensive knowledge base, Integrity Mechanical will examine your HVAC and plumbing systems and prepare a preventative maintenance and service plan designed specifically for your systems. Video pipe inspections can be made on plumbing systems to check the quality of the system from the inside out.

The thorough examination will include investigation of upgrades and replacements to ensure the most cost-effective operation.

Your custom plan will include 24 hour on-call emergency service.

GENERATORS

Integrity Mechanical provides and services a variety of brands and models of generators. In addition, Integrity is a factory-authorized **Kohler**® Power Systems full service dealer. As a Kohler dealer, we are authorized to perform start-ups and warranty repairs on its full line of generators with different levels of power.

CuraFlo®

RESTORING PIPES & PEACE OF MIND

CuraFlo Engineered Flow Lining System™ is an applied in-place lining process for domestic water systems with 1/2" through 4" copper & steel pipe. While performing this process we inspect, clean and repair pipes suffering from pinhole leaks and restricted flow due to mineral buildup. **CuraPoxy**® coating is installed to the inside of the pipes. Upon completion of this process your pipes will be protected from future corrosion and buildup. This system is certified to meet IGC 189-2006 and meets the ANSI/NSF 61 standard by IAPMO for use on domestic water systems.

This product has a cure time of just 5 hours and complies with the applicable sections of both the UPC & IPC. Pipes lined with this epoxy are designed to have a useful life of 40 to 60 years.
